

Week 5, April 22-29

Hi Lena Families,

I have been thinking of you all so much and I can't believe we are into week 5 of distance learning. I miss all of my students and hope you have all been enjoying the Lena staff videos we have been making for you.

Please remember everything I send home for music is completely optional! My intention is to provide creative activities and brain breaks, not to create more challenging work for you at home.

On the back of this page are directions to make your very own egg shaker to keep at home! I hope you enjoy making your own instrument. And as always, I will continue to post digital learning activities on our Lena music website at:

Lenamusicmsd.weebly.com

Stay safe!

-Ms. Davies, Music

MAKE YOUR OWN SHAKER

This week at packet pickup I provided you with all the materials you need to make your own shaker. Let's make one!

You will need:

1. Plastic egg (or some other container like an empty and DRY plastic bottle)
2. Rice, dry beans, pasta or small gravel
3. Tape

Directions

1. Carefully open your plastic egg (or other container).
2. With an adult's help, carefully add the rice to your egg. Experiment with how much rice you add. What changes when you add more rice?
3. Close your egg and tape it shut.
4. Play along with our Egg Detective video using the QR below!
